- We know what will be on the test.
- Let us show you!

**Content:** The eKnowledge SAT Power Prep Program was designed to cover and track every testable point. Studying with us will give you confidence knowing you have covered every topic and every question-type that could possibly appear on your SAT exam.

**Structure:** We divided the video workshops into 120 interactive, multimedia mini-lessons. This allows you to group your test preparation into logically organized, short study periods. You simply work your way through the segments-watch a segment and do the associated practice questions and then move on to the next segment. Also the program allows you to easily track your progress. Following this systematic program you will cover

every topic and question-type possible on the SAT exam. This kind of study creates confidence!

Two ways to prepare:

## 1. Comprehensive Preparation

Watch every segment and do every practice question and quiz-this will guarantee you have learned every concept, topic, and question-type the SAT exam makers could present. Then practice what you have learned using actual exams from the REAL SAT book.

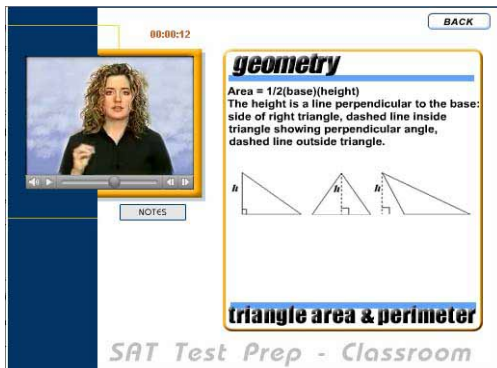

## 2. Targeted Preparation

Already know where you need help? Use the program to target the areas you want to improve. Do the practice questions for each segment. When you get to a question that gives you trouble-stop and watch the workshop associated with that segment. Then practice what you have learned using selections from the REAL SAT.
