

Strategic Planning Committee Minutes
August 3, 2009

The SPC members reviewed the data in the Results of an Aligned Curriculum. Current data for some areas is not available through our data source, AEIS Report, since it is not available until November. Corrections were made to the number of dropouts who were reported in 2009. There were two dropouts for the year rather than the one that had been reported in the document. The summary was also changed to reflect this change in dropout numbers. These changes and data on Adequate Yearly Progress, AYP, will be added prior to printing the document for the staff.

Rita Polen informed the Strategic Planning Committee members that the committee's work would be folded into the responsibilities of the Districtwide Improvement Committee. She thanked the members for their long-term participation on this committee and thanked them for all they have done for RFISD through the work of this committee.
